Elizabeth Clohosey RT(R)(M)

Software Developer | Radiology Informatics | Versatile Professional

<u>ElizabethClohosey@gmail.com</u> | <u>linkedin.com/in/ElizabethClohosey</u> | <u>github.com/ElizabethClohosey</u> | <u>ElizabethClohosey.com</u>

Professional Summary

ARRT-certified radiologic technologist and full-stack developer with experience in PACS/RIS systems, clinical imaging environments, and healthcare interoperability standards including DICOM, HL7, and FHIR. Skilled at translating clinical workflows into technical solutions using tools like React, Node.js, and RESTful APIs. Known for strong communication, clear documentation, and bridging gaps between clinical and technical teams.

Technical Skills & Core Competencies

Radiology & Imaging Systems

PACS/RIS optimization | Radiology workflow documentation | MQSA & ACR compliance | Cross-functional collaboration | Familiarity with DICOM standards | Basic understanding of HL7 standards | Basic understanding of FHIR standards

Software & Development

React | Node.js | MongoDB | SQL / MySQL | RESTful APIs | JSON data formats | Basic knowledge of AWS services | Linux command line interface | Fundamentals of UI/UX design

Professional Strengths

End-user training for radiologists and technologists | Clear documentation and follow-through | Troubleshooting across hardware and software | Effective communication bridging clinical and technical teams

Development Experience

Full-Stack Developer

SembraCare | Raleigh, NC | February 2023 - December 2024

- Built 3+ applications automating homecare workflows for 250+ clients.
- Created user stories and documentation, integrated third-party APIs for data efficiency.
- Developed PDF-enabled task review system supporting audits for 1,000+ patients.
- Conducted A/B testing and incorporated feedback to align features with care operations.

Frontend Developer

SembraCare | Raleigh, NC | February 2020 – February 2023

- Built reusable UI component systems and libraries to streamline design and reduce development time by 20–30%.
- Developed responsive, accessible interfaces with third-party API integration.
- Collaborated with product teams to refine designs and document UI requirements.

Selected Projects

Task Review & Auditing System Full-Stack Developer

Technologies: Node.js, REST APIs, pdf-lib, pdfkit

 Developed a scalable API and database to support compliance-driven task reviews for 1,000+ homecare visits.

Elizabeth Clohosey | Page 2

- Designed dynamic logic to audit care tasks across rolling 90-day periods based on evolving clinical needs
- Translated manual workflows into digital systems through tight cross-functional collaboration.

Reusable Component Library & UI System Frontend Engineer/Project Manager

Technologies: React, CSS, NPM

- Spearheaded the development of a reusable component system to unify frontend design across multiple healthcare applications; reduced duplicated code by over 50%.
- Built and published custom NPM packages and CSS libraries to accelerate cross-team development.
- Acted as sole developer and project manager for scoping, design, development, and integration.

HealthCare Experience

Senior/Lead Mammography and Radiologic Technologist

Various Medical Facilities | September 2003 – November 2019

- Performed high-quality imaging in Mammography, Biopsy, X-ray, CT, Fluoroscopy, and DEXA.
- Trained technologists on positioning and PACS/RIS usage to improve team performance.
- Rebuilt QA/QC programs to maintain MQSA compliance and streamline inspections.
- Collaborated with physicians and radiologists to prepare for inspections and served as a liaison to management, resulting in successful MQSA inspections and ACR accreditations.
- Provided direct support to radiologists using PACS/RIS systems, troubleshooting workflow issues and sharing insights that later informed homecare application development.

Education

Full-Stack Coding Program

University of North Carolina

Completed an intensive bootcamp focused on full-stack development. Gained hands-on experience with React. Node is, Express, MongoDB, and Agile methodologies to build and deploy dynamic web applications.

Radiologic Technology Program

Mercy Medical Center School of Radiography

Completed a comprehensive program in medical imaging and healthcare operations. Developed expertise in clinical workflows, patient data handling, and regulatory compliance, supporting a strong foundation for building healthcare-focused software solutions.
